EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alexander Smolenski, Jr. on 03/09/06.

The application has been amended as follows:

In claim 25, line 7 the word "causing" has been changed to --allowing--.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a transporter having a support platform defining a fore-aft plane; plural ground contacting elements attached to the support platform with a tiltable pivot element coupled to at least one ground contacting element; a user interface allowing tilt of the pivot element in an operating mode in which the support platform remains statically stable with respect to tipping in the fore-aft plane whereby a sensor module generates a signal indicative of the tilt of the pivot element and a controller commands a motorized drive attached to one of the ground contacting elements based on the tilt signal.

The Request for Continued Examination (RCE) filed 1/27/06 has been received and the amendments therein considered.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
